

Ful-Power Golden Rules!

- ✓ Ful-Power fulvic acid increases the uptake of nutrients and reduce nutrient leaching, thus reducing fertilizer inputs, meaning more cash in your pocket.
- ✓ Helps the plant increase root growth and biomass leading to improved yield and plant health.
- ✓ Detoxifies pollutants and/or heavy metals in the water/soil and keeps them from being taken up by the plant. It also reduces salt build up.
- ✓ Ful-Power is an excellent foliar spray and acts as a penetrant, increasing the efficiency of other materials sprayed.
- ✓ Ful-Power is compatible with any system, is soluble in ALL pH ranges and compatible with all fertilizers (unlike black/brown humic liquid)!
- ✓ Ful-Power is brewed in small batches, each taking 3 months to make.
- ✓ The unique cold-microbial process mimics the earth's natural processes resulting in a product that is a true isolate and not a fulvate (salt of fulvic acid). It also contains enzymes and phytostimulants leftover from the "fermentation" process that are beneficial to plant health and growth.
- ✓ No chemicals, preservatives or acids are ever used to make Ful-Power, it is 100% natural.
- ✓ Ful-Power is listed by OMRI and all BioAg products meet NOP standards.
- ✓ Ful-Power is made by humic scientists with over 50 years combined experience working with humic acids.
- ✓ Ful-Power is made with superior raw sources, sourced from the U.S. (not China).
- ✓ Ful-Power is stable over long periods and won't degrade on the shelf
- ✓ Humic substances are considered natural and safe by the EPA, safe enough to eat (we sell human grade too!).
- ✓ In OR and CA the state agricultural departments put fulvic acid, ulmic and humin under the same umbrella as humic. Ful-Power "humic" acid is purely the low-molecular-weight fraction, or fulvic acid, labeled as humic to satisfy OR and CA regulations.
- ✓ Ful-Power is made in Independence, OR and is a 100% U.S. manufactured product made by a family owned business

Manufactured by Faust Bio-Agricultural Services, Inc
6080 Wigrich Road, Independence OR 97351
