Thanks for this product... I can't
 begin to describe my experiences.

Being in business to sell and apply
 soil amendments and fertilizers, I've
 found no other product that equals
 the all-around quality and performance
 of Humisolve.

IN w/colorado where top soils are slim to none.
 No single other product applied can soften soils &
 upgrade plants turning weeds into feeds and
 taking feeds to their full potential packed
 with nutrition and feed values

My rented horse pasture has gone from an over
 grazed, weed infested 10 acre property to a
 respectfully maintained grassy paddock.
 Soils previously were cracked, compacted, and
 grazing wastelands. Now they have changed so
 dramatically in one season that the landowners
 have refused to change me pasture rent as the
 change has been so remarkable and to their
 delight

Thank you again John M. Buehner
